

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country journey in their RV. Newly retired, after spending many years working with his brother to assemble their crane company into an market leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

All through their journey, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could promptly and securely elevate individuals in the air to accomplish upkeep and other construction services.

After returning from their trip, John set up a business with two of his friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design essentials of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the business has extended itself into many different international marketplaces and continues to develop contemporary machines to ensure that customers are able to become safer and more well-organized within their workplace.
