

Fork Positioner for Forklift

Forklift Fork Positioner - The fork positioner is actually a hydraulic device that can allow the the one driving to be able to control the lift truck without leaving the seat. They are made out of top quality materials and are meant to be able to endure the most demanding procedures and work surroundings. Side shifting models have the extra ability to laterally position the entire load or the arms so as to facilitate much more accurate lifting and position in a quicker and more effective way.

The only one of its kind fork pocket design could enable the person operating it to be able to safely swing the unit's forks without any worry of damaging the positioning cylinders. This could allow the operator the option to either perform simultaneous or independent fork movement, depending on the requirements of the job. For most lift trucks with non-OEM carriages, complete carriages are needed. Standard OEM carriages can be converted into fork positioners on available units.
